

LED Illuminated Grille suitable for BMW G60/G61 – Quick Install Guide

IMPORTANT PREPARATION STEP

■ Disconnect vehicle battery before installation. Professional installation recommended.

1

All accessories are as shown in the picture.

2

Open the hood, remove the front bumper, and replace the original grille.

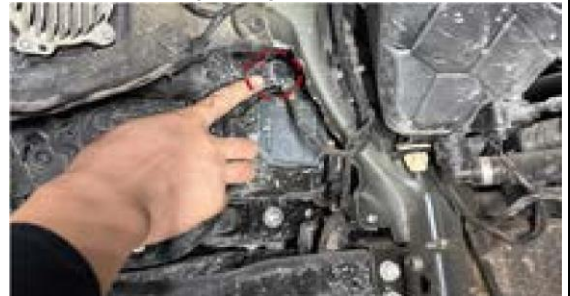

3

Remove the car's fender liner. Turn the tires fully right to improve access.

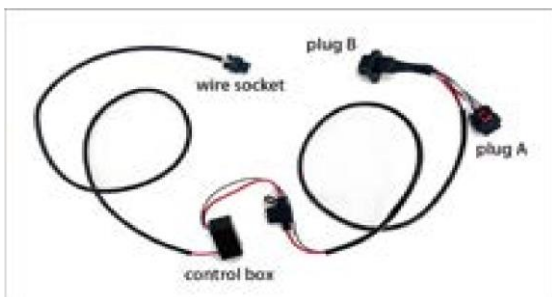

4

Locate the headlight plug and disconnect it.

5

Locate the wiring harness provided with the product.

6

Connect Plug B to the headlight plug, and Plug A to the original headlight socket.

7

Route the LED module wire neatly toward the grille.

8

Install the illuminated grille and reinstall the bumper.
